Hiring Team

Samsara

Re: Principal Business Technology Product Manager

Dear Hiring Team at Samsara,

My background as a Business Analyst/Project Manager/Scrum Master is a direct match for the Principal Business Technology Product Manager role at Samsara. I have architected a test-evidence automation harness that cut effort by $\approx 92\%$ for 200+ SIT/E2E scenarios, directly aligning with this role's mandate to ship solutions that make sellers faster and more accurate.

The role calls for owning the roadmap for seller-facing quoting, approvals, and opportunity workflows across Salesforce and CPQ, translating ambiguous go-to-market problems into shipped solutions with clear, measurable outcomes. At the Australian Taxation Office, I led end-to-end delivery for the Agile Kookaburras squad on the Payday Super reform program, owning sprint cadence, PI Planning, and executive status reporting while converting a mathematically infeasible SIT window into an achievable plan through a tiered harness build with a formal go/no-go gate. The job also requires hands-on comfort building with modern AI tools to prototype and build directly. I stood up an end-to-end Langfuse + Phoenix evaluation stack to score hallucination, latency, and cost across high-volume daily LLM generations, reducing error budget breaches by 38% in a simulated production environment, and I architected a Next.js + Supabase analytics application to expose sprint velocity metrics and generate LLM-powered retrospective insights. My work has consistently involved partnering deeply with cross-functional stakeholders—convening a cross-discipline technical war room that produced a binding automation recommendation in under three hours and unblocking stalled function testing through targeted SME enablement while steering delivery to 95%+ completion.

I would welcome the opportunity to discuss how my experience building internal tools with measurable adoption and iterating on AI-assisted workflows can support the Sales Execution pod's goals. I am available for a call at your convenience and can adapt to your team's working hours from Melbourne.

Sincerely,
Vikram Deshpande
